

AVIS SPÉCIAL / SPECIAL NOTICE

November 17, 2016

To the residents and businesses of the Municipality of Campbell's Bay:

❖ UPDATE - REPLACEMENT OF THE MAIN WATERLINE – FRONT STREET

UPDATE - Phase 1A pertaining to the replacement of the main waterline for part of Front Street (Ringrose Street to Stevenson's Creek) is scheduled to begin November 21 2016. The work is estimated to take 2 weeks.

Phase 1B pertaining to the looping of this portion of Front Street under Stevenson's Creek is scheduled for spring 2017.

Parking along Front St, from Ringrose St to Stevenson Creek, is temporarily not allowed during the project.

Due to budget constraints, work excluded from the original project was the looping of the main waterline on McLellan Street and the replacement of the main waterline for part of Front Street (Stevenson's Creek to Pontiac Street).

As part of the Gas Tax Transfer program, the project aims to maintain a high standard of quality water throughout the municipal distribution network.

During this period, a temporary water supply system will be in place for the affected area. There will be brief interruptions of water, boil water notices and traffic restrictions in this area. Access for pedestrians and access to buildings will be maintained throughout the construction period. We invite you to stay informed concerning these developments via public notices posted at the bulletin board situated at the Municipal Office and through the Campbell's Bay Facebook Page and website: www.campbellsbay.ca.

All efforts to minimize noise caused by construction equipment are in place.

Despite all precautions, we apologize for any inconvenience this may cause you and we thank you for your co-operation.

Additional information is available from Sarah Bertrand at the municipal office - 819 648 5811
